**C Square Quartz Coil**  
Wax Saving

**FEATURES**

- Replaceable and multiple choices of atomizing coil.
- Three preset temperature settings to meet different needs.
- Easy to use with magnetic bubbler connection.
- Universal 12mm thread connection matches a variety of filters.
- Hidden dab tool.
- Battery capacity: 950MAH.
- Charging current: 250MA
- Charging input voltage: USB 5V

**HOW TO USE**

- Open the magnetic cap and put WAX into the coil chamber.
- Continuously press the button 5 times within 2 seconds to turn on the device. The device starts automatic preheating after startup and the green-blue-white ticker flashes 8 seconds. After preheating, the device will default to the Mode 1 (Low): Green voltage setting.
- Continuously press the button 2 times to switch the gear within 0.8 second: green > blue > white > green. Long press the button, and the device will work at current mode meanwhile the gear light flashes. The working duration is 10 seconds. After the time is out, the current gear light will flash 3 times meanwhile the device vibrates and automatically stops working.  
Mode 1 (Low): Green - 3.5V    Mode 2 (Mid): Blue - 3.7V    Mode 3 (High): White - 3.9V
- Turn off: Press the power button 5 times within 2S to turn off the device (The indicator light will flash white 3 times)
- The device will automatically power off if there is no operation for 5 minutes

Caution: It can damage the atomizer coil or the device if it is used without wax in the atomizer coil.

**ALARMS**

- Low battery alarm: The red light flashes 5 times meanwhile the motor vibrates. Please charge the device before use.
- High temperature alarm: The purple light flashes 5 times meanwhile the motor vibrates. Please cool down the device before use.
- Short-circuit alarm: The yellow light flashes 8 times meanwhile the motor vibrates. Please replace the atomizing core before use.
- Open-circuit alarm: The yellow light flashes 5 times meanwhile the motor vibrates. Please replace the atomizing core before use.

High-temperature protection / Overcharging protection / Short-circuit protection / Low battery protection

**CHARGING STATUS OF LED LIGHT**

- Battery is charging: The red LED light is on after USB is inserted.
- Battery is fully charged: The green LED light is on after USB is inserted.
